CONVERSION PROGRAM TERMS AND CONDITIONS

Version	1.0
Effective date	October 13, 2026

1. Introductory provisions

1.1. These terms and conditions (the “Terms”) govern the Conversion Program service operated by Coingarage US LLC, a Montana domestic, manager-managed limited liability company (Montana entity no. C1586676), principal office at 1001 S MAIN ST, STE 600, KALISPELL, MONTANA 59901, USA, contact email support@coingarage.us (“Coingarage US” or the “Operator”), through a platform operated by Coingarage US (the “Platform”).

1.2. The Conversion Program is a limited service available exclusively to persons who, before initiating a specific conversion, lawfully hold and control the crypto-asset EEZY and satisfy the eligibility requirements set out in these Terms (a “Participant”). It enables existing EEZY holdings to be exchanged for the crypto-asset GARA on the terms displayed before confirmation.

1.3. The Conversion Program is not intended for the acquisition of EEZY by new persons, the distribution of EEZY, market-making in EEZY, operation of a multilateral trading system, or general trading in EEZY or GARA.

1.4. The Conversion Program is not a staking, savings, lending, interest-bearing or other yield-bearing product. Participation in the Conversion Program or the transfer restriction applicable to GARA does not entitle the Participant to interest, rewards, bonuses, staking rewards, profit participation or any other additional cash or token payment.

1.5. Availability of the Conversion Program to any particular person is always conditional upon the service being lawfully available under the laws and regulations applicable to the Operator, the Participant and the relevant transaction. Mere technical access to the Platform or these Terms does not create a legal entitlement to the service.

2. GARA and the roles of the relevant persons

2.1. GARA is an ERC-20 crypto-asset operated on the Polygon network, smart-contract address 0x0B258A4ECC4Ac7a15fEdb882DB5d13F6EF23B02F.

2.2. The issuer of GARA is Coingarage s.r.o., Czech Republic (the “Issuer”).

2.3. Coingarage US is not the issuer of GARA. Within the Conversion Program, Coingarage US acts as the Participant’s separate contractual counterparty and provides the agreed amount of GARA as consideration for the EEZY transferred by the Participant. This provision does not purport to determine the legal or regulatory classification of a particular transaction, which is determined by its actual characteristics and applicable law.

2.4. Before confirming a conversion, the Participant will have access to the material information concerning GARA and the Conversion Program made available by the Platform.

2.5. The Participant acknowledges that the value of GARA may rise or fall significantly and that GARA may lose some or all of its value. The Conversion Program provides no guarantee of the current or future value, liquidity or tradability of GARA.

3. Eligibility

3.1. The Conversion Program may only be used by a person who:

a) lawfully holds and controls the amount of EEZY to be converted at the time the conversion is initiated and is authorized to dispose of it;

b) successfully completes the identification and verification procedures required by the Platform;

c) passes applicable AML/CFT, sanctions, fraud-prevention and other compliance checks;

d) demonstrates control over the EEZY or authority to dispose of it by a method objectively verifiable by the Operator;

e) meets the jurisdictional eligibility requirements for the Conversion Program; and

f) accepts these Terms and the parameters of the relevant conversion.

3.2. Holding and authority to dispose of EEZY will ordinarily be demonstrated by transfer of the relevant EEZY as part of completion of the conversion or by another reasonable and objectively verifiable method required by the Platform. The Participant does not need to be a person whose historical ownership or holding of EEZY was previously known to or recorded by the Operator.

3.3. Before a conversion, the Operator may request additional information or documents where reasonably necessary to verify authority to dispose of EEZY, source of crypto-assets, beneficial ownership, AML/CFT matters, sanctions, tax matters, regulatory compliance or fraud prevention.

3.4. Mere holding of EEZY does not create a legal entitlement to admission to the Conversion Program. The Operator may reject an application or suspend or decline a transaction where required by applicable law, sanctions or AML/CFT controls, jurisdictional restrictions, security considerations or reasonable concerns regarding the source, holding or lawful control of the EEZY.

4. Exchange of EEZY for GARA

4.1. The Conversion Program permits only the following exchange:

EEZY → GARA

4.2. Bitcoin, Ether, stablecoins, fiat funds or any other crypto-assets cannot be exchanged for GARA within the Conversion Program, and GARA cannot be exchanged back for EEZY within the Program.

4.3. A conversion is a direct contractual transaction between the Participant and Coingarage US. The Participant transfers the agreed amount of EEZY to Coingarage US and Coingarage US provides the Participant with the agreed final amount of GARA.

4.4. Coingarage US does not act in the transaction as the Participant's agent or as an intermediary between the Participant and a third party, unless expressly stated otherwise for a particular transaction before confirmation where required by applicable law.

4.5. The Conversion Program does not provide a secondary market, future repurchase of GARA, reverse conversion or any minimum price for GARA after the Lock Period.

5. Exchange ratio and pre-transaction information

5.1. The EEZY/GARA exchange ratio is set by Coingarage US as a commercial parameter of the Conversion Program for a specific transaction or a specified period.

5.2. Before final confirmation of each conversion, the Platform will clearly display to the Participant at least:

a) the amount of EEZY to be converted;

b) the EEZY/GARA exchange ratio;

c) the final amount of GARA to be received by the Participant;

d) the duration of the Lock Period and the specific date on which it ends (the "End Date");

e) all fees, network costs and other costs charged by or known to the Operator in connection with the transaction; and

f) material restrictions and risks specific to the transaction, unless already adequately disclosed in these Terms or mandatory information documents.

5.3. The displayed exchange ratio and amount of GARA constitute the full token consideration for the EEZY transferred, other than any fees or costs expressly disclosed before confirmation.

5.4. The exchange ratio does not constitute interest, yield, a staking reward, a holding bonus or a promise as to the current or future value of GARA.

5.5. By confirming the conversion, the Participant expressly agrees to the displayed exchange ratio, the resulting amount of GARA and any applicable costs.

5.6. Before confirming the conversion, the Platform will clearly display the Lock Period and the specific date on which the Lock Period ends. By confirming the conversion, the Participant accepts those parameters together with the other displayed conversion parameters.

5.7. Unless stated otherwise, displayed parameters are valid only for the period specified by the Platform and may change after that period before a new transaction is initiated.

6. Formation, execution and completion

6.1. Through the Platform, the Participant submits an instruction to convert a selected amount of lawfully held EEZY into GARA.

6.2. Before final confirmation, the Platform displays the information specified in Article 5.2 and allows the Participant to reject or not confirm the transaction.

6.3. A contract for a specific conversion is concluded when, after all material parameters have been displayed, the Participant finally confirms the transaction and Coingarage US accepts it. Acceptance may be conditional upon successful completion of compliance and technical checks.

6.4. A conversion is completed when the applicable amount of EEZY has been debited, transferred or otherwise applied to the conversion and the resulting amount of GARA has been recorded in the Participant’s Account as locked GARA.

6.5. If the conversion cannot be completed after the Participant’s EEZY has been debited or transferred, Coingarage will take commercially reasonable steps to complete the conversion or return the applicable EEZY, subject to technical feasibility and applicable law.

6.6. Upon completion, the amount of GARA displayed and confirmed for the conversion is recorded in the Participant’s Account and becomes subject to the Lock Period.

6.7. Upon completion of the conversion, the EEZY used for the conversion is transferred to Coingarage US and is no longer available to the Participant, except where these Terms or applicable law provide otherwise.

6.8. The Platform will record at least the completion date and time, amount of EEZY, exchange ratio, amount of GARA allocated and the End Date of the Lock Period so that the transaction can be evidenced retrospectively.

6.9. Once completed, the conversion is final, subject to rights that cannot validly be waived under mandatory law and to correction of any manifest pricing, technical, processing, duplicate or record-keeping error in accordance with the General Terms and applicable law.

7. Restriction on transferability of GARA

7.1. GARA obtained through the Conversion Program is subject to a two-year lock period starting on the date of the completed conversion and ending on the End Date displayed by the Platform (the “Lock Period”).

7.2. During the Lock Period, locked GARA is unavailable for sale, transfer, exchange or withdrawal through the Platform.

7.3. The Lock Period does not change the amount of GARA obtained in the conversion and does not create any entitlement to additional GARA, interest, rewards, bonuses or yield.

7.4. The lock is implemented as an account-level restriction maintained by the Platform. The applicable GARA amount is recorded in the Participant's Account as "locked" until the end of the Lock Period.

7.5. The Platform will display the locked GARA amount and the applicable End Date.

8. End of the Lock Period

8.1. The Lock Period expires at the end of the End Date displayed by the Platform. Following expiry of the Lock Period, the applicable GARA will cease to be recorded as locked and will become available in the Participant's Account, subject to applicable legal, compliance or security restrictions.

8.2. At the end of the Lock Period:

a) no new GARA is created;

b) the amount of GARA acquired in the original conversion does not change;

c) no interest, bonus, reward or yield becomes due; and

d) the Participant merely becomes able to freely dispose of the GARA already acquired, unless applicable law or a specific legally required compliance measure provides otherwise.

8.3. If the release of locked GARA at the end of the Lock Period is delayed for reasons attributable to the Operator, the Participant's remedies under applicable law remain unaffected.

9. Risks

9.1. The Participant acknowledges in particular that:

a) GARA is a crypto-asset and its value may fluctuate materially or fall to zero;

b) during the Lock Period the Participant cannot react to market price changes by selling or transferring locked GARA;

c) after the Lock Period there may be no sufficiently liquid market for GARA or no possibility of selling at the expected price;

d) regulatory, technological, tax or market changes may affect the use, transferability or value of GARA;

e) Platform, blockchain network, software, infrastructure or other technical failures may affect the availability, processing or transfer of GARA;

f) the value of EEZY transferred and GARA received may evolve differently after completion of the conversion; and

g) the Conversion Program provides no guarantee of profit, preservation of value, liquidity or future market price of GARA.

9.2. Coingarage US does not provide investment, legal, tax or other personalized advice to the Participant within the Conversion Program. Information displayed on the Platform is intended to describe the service and the relevant transaction.

9.3. The Participant decides independently whether to proceed with a conversion based on the parameters of the specific transaction, the Participant's own assessment of the risks and the information required to be provided under applicable law.

10. Compliance and jurisdictional restrictions

10.1. The Conversion Program is available only in jurisdictions and to persons to whom Coingarage US may lawfully provide it under applicable laws and regulatory requirements.

10.2. Availability may differ by jurisdiction, customer category or other applicable eligibility requirements.

10.3. Before a conversion, Coingarage US may request information or documents reasonably necessary to verify the Participant's identity, residence, ownership or control of EEZY, source of assets and other matters required for AML/CFT, sanctions, fraud-prevention, tax or regulatory compliance.

10.4. Coingarage US may reject, suspend or decline a conversion where required or reasonably necessary for legal, regulatory, compliance, sanctions, fraud-prevention or security reasons.

11. Nature of the Conversion Program

11.1. The Conversion Program is a limited mechanism for exchanging EEZY for GARA available exclusively to eligible existing holders of EEZY.

11.2. The Conversion Program is not proof-of-stake staking, validator staking, delegated staking or any other distributed-ledger validation activity.

11.3. EEZY and GARA are not used by the Participant within the Conversion Program to validate blockchain transactions and no blockchain reward arises for the Participant on that basis.

11.4. The Lock Period is only a pre-agreed technical restriction on transferability of GARA acquired through a conversion. Its existence does not by itself determine the legal or regulatory nature of the service, which is assessed according to the Program's actual operation and applicable law.

11.5. All economic consideration received by the Participant for transferred EEZY is determined upon completion of the conversion. The amount of GARA does not increase during the Lock Period by reference to the length of time it is held.

11.6. The Conversion Program is separate from any previous or other service referred to as GARA Stake, and participation in the Conversion Program does not create rights under or continue any such service unless expressly agreed otherwise in writing.

12. Technical and operational matters

12.1. Before completion, the Operator may reject or delay a transaction due in particular to a technical error, Platform or relevant third-party infrastructure unavailability, a suspected security incident, failure to meet compliance requirements, insufficient GARA available to complete the conversion or another serious operational or legal reason.

12.2. If a conversion has not been completed in accordance with Article 6.4, the Participant acquires no right to GARA from that incomplete conversion and the Participant's EEZY must not be permanently retained by Coingarage US without completion of the conversion or remediation under Article 6.5.

12.3. The Operator may carry out necessary maintenance of the Platform or account-level lock functionality. Planned maintenance should, where reasonably possible, be announced in advance and must not be used to alter the exchange ratio, amount of GARA or duration of the Lock Period for an already completed conversion.

12.4. The Operator is not liable for outages or delays caused exclusively by a blockchain network or other infrastructure outside its reasonable control where it has taken reasonable steps to prevent and mitigate the consequences; rights that cannot be contractually limited remain unaffected.

13. Participant obligations and representations

13.1. The Participant confirms that information provided to the Operator is true, complete and current and that the Participant lawfully holds the EEZY used for the conversion and is authorized to dispose of it.

13.2. The Participant must not use in the Conversion Program crypto-assets belonging to a third party without authority, crypto-assets derived from unlawful activity or assets whose use would breach sanctions or other applicable law.

13.3. The Participant is responsible for securing credentials, devices and wallets under the Participant's exclusive control. The Operator remains responsible for its own security and account-protection obligations under applicable law.

13.4. The Participant must notify the Operator without undue delay of any suspected unauthorized access, account misuse or other security incident that may affect the Conversion Program.

14. Fees and tax obligations

14.1. All fees and costs charged by the Operator in connection with a particular conversion will be displayed before final confirmation. After completion of the conversion, the Operator may not unilaterally add a fee that was not disclosed before confirmation, except for costs arising directly by operation of law that could not reasonably have been determined in advance.

14.2. The Participant is responsible for the Participant's own tax obligations relating to the conversion, holding or subsequent disposal of EEZY or GARA, unless applicable law requires the Operator to withhold, pay or report a tax.

15. Liability

15.1. Each party is liable for breach of its obligations to the extent provided by applicable law.

15.2. The Operator is not liable for changes in the market value of EEZY or GARA or for losses caused solely by market, liquidity or price movements, unless such loss results from a breach of the Operator's obligations.

15.3. The Operator is not liable for damage caused exclusively by circumstances outside its reasonable control that it could not have prevented or overcome by exercising reasonable professional care. This provision does not apply to the extent liability cannot be excluded or limited under mandatory law.

15.4. Nothing in these Terms excludes or limits liability for willful misconduct, gross negligence, breach of an obligation where limitation is prohibited by mandatory law, or statutory consumer rights.

16. Personal data and communications

16.1. Processing of personal data in connection with the Conversion Program is governed by the applicable privacy notice made available on the Platform and applicable data protection law.

16.2. Contractual and transaction communications may be conducted electronically through the Platform, by email or by another communication method specified by the Operator. The Operator retains records of legally relevant communications and transactions for the period required by applicable law.

17. Complaints and remedies

17.1. A Participant may submit a complaint through the contact channel specified on the Platform or at support@coingarage.us. The Operator will handle the complaint impartially and within a reasonable period, and in any event within any period required by applicable law.

17.2. Where the Participant is a consumer or applicable law grants the Participant specific procedural or out-of-court remedies, those rights are not affected by these Terms.

18. Final provisions

18.1. These Terms govern the Conversion Program only and do not constitute the terms of a staking or other yield-bearing service.

18.2. Coingarage US may suspend, restrict or terminate the Conversion Program for new transactions. Such decision does not alter the amount of GARA already acquired by Participants, the agreed duration of the Lock Period or other rights arising from completed conversions, unless a change is required by mandatory law or a binding decision of a competent authority.

18.3. Coingarage US may amend these Terms for future transactions. An amendment may not retroactively alter the exchange ratio, amount of GARA, time of acquisition or duration of the Lock Period for an already completed conversion unless mandatory law provides otherwise.

18.4. The General Terms apply to all matters not specifically addressed here, including eligibility, Supported Jurisdictions, Account security, custody, AML/BSA and sanctions controls, privacy, liability, tax responsibility, governing law and dispute resolution.

18.5. If any provision of these Terms is invalid, ineffective or unenforceable, the remaining provisions remain unaffected where the invalid or unenforceable part can be severed without changing the substance of the contractual relationship.

18.6. These Terms take effect on October 13, 2026.
